

## On the Subject of What's on Second

You know Who's on First. But have you ever thought about the guy before him? The guy that almost won but didn't? Well, good luck, 'cause he's having his revenge... .

1. Read the display/determine the display text's color to determine which button label to use. Use the [Locating The Button Label](#) table to determine what button position you must use (in reading order).
2. Read the display/determine the display text's color to determine which button text color to use. Use the [Locating The Text Color](#) table to determine what button position you must use (in reading order).
3. Combine the result gathered from Step 1 and Step 2. Use the [Determining The List](#) table and the gathered combination to locate the list that you will be using.
4. Gather all the button labels on the module. Remove the button label that was gathered on Step 1 on the labels you have gathered. Using the given list plus the button labels you have gathered, locate the the button label that is in the middle of the list. That is the correct button that must be pressed.
5. Repeat until you solve 3 stages in a row. Striking resets your solves.

Locating the Button Label
